

Ashi Gupta , (Serving NP)

Senior .NET Backend Engineer @ **Notified** | Microservices & Distributed Systems | Azure & AWS
Bengaluru, IN | [+91 9999108165](tel:+919999108165) | ashi.gupta1@outlook.com | linkedin.com/in/ashi-gupta-se

Professional Summary

Senior Backend .NET Engineer with **8+ years of experience** delivering enterprise-scale distributed systems across AWS and Microsoft Azure. Drove German market expansion and AI-powered product innovation at Notified while establishing organization-wide engineering standards. Proficient in C#, .NET 8, ASP.NET Core, Entity Framework Core, SQL Server, and event-driven architecture.

Skills

Backend: C#, .NET 8/.NET Core, ASP.NET Core, ASP.NET Web API, ASP.NET MVC, Entity Framework Core, LINQ, Middleware, MediatR, Polly, Serilog, Azure Service Bus, AWS SQS

Architecture: Microservices, Clean Architecture, CQRS, Outbox Pattern, Saga Pattern, Event-Driven Architecture, Circuit Breaker, RESTful API Design, DDD, System Design, Performance Optimization

Cloud: Azure (App Services, Functions, Blob Storage, Service Bus, Application Insights, DevOps) | AWS (S3, SQS, Lambda, Valkey, Secret Manager, RDS, EC2, EKS, Kubernetes)

Database: SQL Server, Azure SQL Database, Redis, OpenSearch, SOLR

Languages: C#, SQL, T-SQL, Python, TypeScript, JavaScript

Testing: NUnit, xUnit, TDD, SonarQube, Test Automation Frameworks

Tools: Docker, Kubernetes, GitHub Copilot, CI/CD, Azure Pipelines, Git, Swagger/OpenAPI, Jira, Datadog, Agile/Scrum

Frontend: Angular, TypeScript, HTML5/CSS3

Work Experience

Notified

Sept 2022 – Present

Senior Software Engineer | Press Release Management & Distribution Platform

- Designed and delivered **scalable RESTful microservices** using .NET 8, Entity Framework Core, and AWS Services, containerized with **Docker** and running on **EKS** with health check and liveness probes, serving thousands of daily users with **99.9% uptime**.
- Introduced the **Outbox Pattern** using Entity Framework Core and AWS SQS for reliable cross-service data synchronization, ensuring **eventual consistency** across distributed microservices with zero message loss.
- Configured **Polly resilience pipelines** with exponential retry and Circuit Breaker for database and HTTP calls, eliminating **cascading failures** and reducing P1 incidents **by 15%**.
- Engineered the **ERS workflow** using AWS Lambda for **German market expansion**, driving regulatory compliance and **increasing feature revenue by 70%**.
- Orchestrated the **CQRS architecture using MediatR** pipeline behaviors for validation, logging, and cross-cutting concerns, decoupling business logic from API controllers and improving **code maintainability by 40%**.
- Established **GitHub Copilot context engineering standards** across the engineering organization, authoring custom instructions, agents, and prompt templates, **reducing development cycle time by 40%** benchmarked on the proprietary engineering dashboard and making code reviews deterministic with automated quality gates.
- Pioneered development of a **market-differentiating AI-powered PR Optimizer platform** using C#, ASP.NET Core, **MediatR**, and **Redis caching**, enabling intelligent content optimization workflows and automated press release creation.
- Led the team to deliver **integration with the CLEAR platform** using RESTful APIs deployed on **EKS**, coordinating across cross-functional teams using **Agile/Scrum** methodology and gaining industry-wide recognition.
- Streamlined **secure feed downloads** using SFTP (Secure File Transfer Protocol) / FTP protocols with Amazon S3, achieving **99% data accuracy** and **reducing manual intervention by 80%**.
- Spearheaded the **Personalized Pitch** feature using ASP.NET Core, enabling customers to send customized outreach emails directly to journalists and **improving media engagement** across the distribution platform.
- Built an **end-to-end test automation dashboard** using .NET Core, Entity Framework Core, Angular with TypeScript, and **Chart.js visualizations**, adopted as the **GO/NO-GO gate for production releases**.

- **Redesigned and refactored risk calculation modules** using C# and .NET Core, improving computational performance and code reusability by **35%**.
- Implemented **Test-Driven Development (TDD)** using NUnit, achieving **90%+ unit test coverage** across critical risk calculation modules.
- Developed **Python automation workflows** for batch data processing and server utilization optimization, reducing manual processing effort and **cutting infrastructure costs by 15%**.
- Deployed risk reporting services on **Azure App Service** with **Azure Service Bus** for async event processing and **Application Insights** for distributed tracing.
- **Served as Release Manager** during major deployments, leading regression testing and Azure DevOps CI/CD pipeline execution, ensuring **100% defect-free releases** across cross-functional teams.

Mindtree

Jun 2018 – Nov 2020

Full Stack Developer | Banking, Financial Services & Insurance (BFSI) Domain

- **Developed enterprise backend services** using ASP.NET Core, custom Middleware, RESTful Application Programming Interfaces (APIs), LINQ, SQL Server, and Microsoft Azure (Azure SQL Database, Azure Data Factory), **cutting average API response time by 40%** through optimized EF Core queries and server-side caching.
- Implemented **OWASP-compliant security measures** including JWT-based Authentication and Authorization, HSTS headers, and X-Frame-Options restrictions, **strengthening application security by 50%**.
- Integrated **SonarQube, NLog centralized logging, and Azure Blob Storage** into the Continuous Integration / Continuous Deployment (CI/CD) pipeline, **reducing production defects by 25%** and improving system monitoring and error traceability.
- **Led a Python automation squad** and mentored junior developers, developing reusable internal tools that **reduced manual effort by 30%** and increased team productivity.

Education

Bachelor of Technology (B.Tech) – Computer Science and Engineering

2014 – 2018

G. L. Bajaj Institute of Technology & Management

Certifications

- [Microsoft Certified: Azure AI Fundamentals \(AI-900\)](#)
- Career Essentials in Generative AI by Microsoft and LinkedIn
- HackerRank – Problem Solving (Intermediate)
